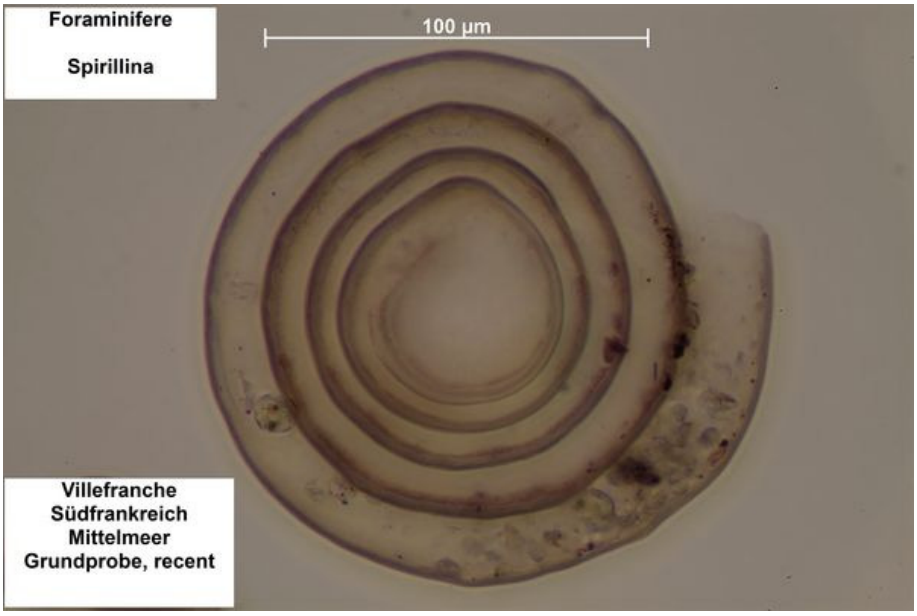
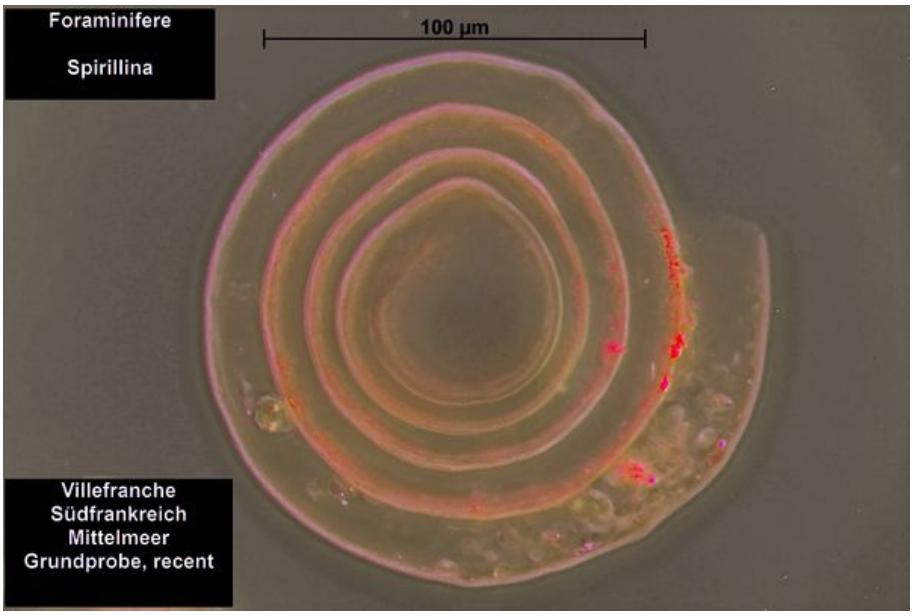
Foraminiferen Villefranche

Es handelt sich um Fotos von Foraminiferen eines Streupräparates welches von Dr. Ralf Nötzel hergestellt wurde.

Foto 1:



Ich bin der Meinung eine **Spirillina** fotografiert zu haben.



Die Dunkelfeldfotos entstanden wie folgt:

- Stapel von Hellfeldfotos mit PICOLAY bearbeitet
- Bemaßen und Beschriften mit AxioVision
- Nachbearbeitung mit GIMP
  Helligkeit und Kontrast anheben
  Werte umdrehen (nicht das Invertieren ist gemeint)
- Bildgröße ändern mit XnView
